STRUCTURES AND THE ENVIRONMENT

V.Ryan © 2009 World Association of Technology Teachers

1. As large structures are constructed, the environment can be **damaged**. Describe five ways in which this type of environmental damage can take place.

A. _____

B. _____

C. _____

D. _____

E. _____

2. Large structures are often constructed for very good reasons. Name two types of structure that, over time, protect the environment. Explain how they protect the environment.

STRUCTURE ONE: _____

EXPLANATION: _____

STRUCTURE TWO: _____

EXPLANATION: _____

3. Sometimes environmental groups will describe a structure, such as a wind generator, as 'visually polluting the environment'. What does this mean? Underline the statement below that best describes 'visually polluting'.

A. Looking at the structure will hurt your eyes.

B. The structure lacks style and is out of place.

C. The structure emits fumes that pollute the atmosphere.

4. Wind generators can cause 'noise pollution'. What does this mean? Answer this question by referring to wind generators.
