

PLYWOOD - EXAMINATION QUESTIONS

USEFUL LINK: <https://technologystudent.com/joints/plywood1.html>

1. Explain why plywood can be described as a composite material. **4 marks**

2. The incomplete sketch below shows individual plies, ready for gluing to form plywood. Add the grain to each ply, clearly showing its direction. Using colour/shade will enhance your marks. **4 marks**

3. Explain the importance in the way the grain of each ply is positioned. **2 marks**
