MAINTENANCE OF PRODUCTS

V.Ryan © 2011 World Association of Technology Teachers

Some products need maintenance checks to ensure that they are not damaged. Occasionally, the user needs to carry out maintenance to ensure that products remain safe to use. One such product is a power drill, shown below. Proper maintenance extends will extend the drills working life.

On the drawing of the power drill (including drill bit), identify parts that need checking for damage or normal wear and tear. Add notes to explain how damage / wear and tear can be corrected.
