Study the picture of the drilling machine. Machines such as these can be dangerous, if they are not risk assessed first.

Complete the hazard table for this piece of equipment.

Complete the table. Some of the answers have already been entered into the table.

HAZARD	SAFEGUARD
Small pieces of material, known as swarf, could 'fly' towards the operator	Position the guard and wear goggles
The chuck key could be left in the chuck	

Why is it important to have safety training before using workshop machinery?
