# THE ULTIMATE ELECTRONIC GADGET

V.Ryan © 2010 World Association of Technology Teachers

We all use electronic gadgets to make our lives easier and to help us to be organised. Some electronic gadgets help us to communicate with each other. For example, a mobile phone will allow people to contact each other from the opposite corners of the world.

1. List all the electronic gadgets you have used or seen.
2. Design the ultimate electronic gadget. This gadget should be designed with you in mind.

You could design a video phone, that also allows you to organise your busy life. It may include an organiser, calendar, calculator and a vast range of other features. You could personalise the device, so that it has a database of quiz questions or has a built in language translator.

Alternatively, the electronic gadget may be a device that helps you develop your knowledge of foreign languages, or sport.

Or the electronic gadget may be a device that allows you to listen to conversations, at a considerable distance. It may include an x-ray device, allowing you to see through walls.

**YOU ARE TO:**

Draw a rough version of your electronic device.

Then, draw a colour rendered version and include labels and notes explaining the features / functions of your electronic device. Describe the use of each of the gadgets - one sentence per gadget.
