IT IS ILLEGAL TO DISPLAY THIS WORK ON ANY WEBSITE/MEDIA STORAGE OTHER THAN [www.technologystudent.com](http://www.technologystudent.com)

# DESIGNER WATCH

V.Ryan © 2010 World Association of Technology Teachers

We all need to know the time !

The world of industry and commerce is like a well oiled machine, with time keeping being an important feature. Banks cannot operate with it's employees knowing the time, the army relies on it's soldiers knowing the time and schools plan their lessons based on the time.

Watches come in a vast range of types and shapes. Some are plain and when the battery fails, they are thrown away and simply replaced. Other watches are expensive and can cost hundreds and even thousands of pounds.

1. You are the design an expensive watch for a customer. First choose your customer.
2. Draw a rough version of the watch and then a colour rendered, final version.
3. Add notes and labels that help explain your design.

## INFORMATION:

The watch could be made from the best materials such as, gold or platinum. It could be encrusted with jewels such as diamonds.

Alternatively, the watch could be for an astronaut. It this case it has to withstand the most difficult of environments and be very accurate.

The watch may be for a friend and be based on an amusing cartoon character
