'APPS' ICON / SYMBOL DESIGNS

V.Ryan © 2010 World Association of Technology Teachers

Touch screen Computers and tablets are very popular. A typical system is seen opposite. Most tablet computers have optional extras, such as keyboard docks.

1. List reasons why people use tablet computers, rather than laptop computers.
2. Owners of tablet computers can buy APPs (applications), that help them carry out a range of tasks. For example, an App exists that will convert pounds / dollars into other currencies.

Some example icons / symbols representing Apps can be seen below:

Design the icons / symbols for five new Apps. The Apps icons should be drawn quite large, so that detail can be seen. Add colour and shade.

Underneath each design, explain what your new App actual does.

3. The 'tablet' computer at the top of the screen, includes a keyboard dock as an optional extra. Design another optional extra. Add explanatory notes to your design.
